

SINCE 
1979

Always Keep With The Best

Let's grow together ...

Japan Industrial Standard (JIS)

HAMKO is a leading manufacturer of Lead Acid batteries in Bangladesh. Apart from battery manufacturing, HAMKO also leads the way in manufacturing battery components, chemicals and supports overall battery manufacturing industries in Bangladesh.

Our Mission

"To position HAMKO as a chosen brand in Bangladesh and abroad through quality and service of our products."

Our vision

To create a world class product with the bundle of humble service makes us responsible to;

- Provide best value for end user/users/customers.
- Play a vital role for environment.
- Make customers/user's daily life easier.
- Increase customer awareness about global impact.

A journey year after year... >>>

HAMKO Motor Cycle Battery Construction & features:

- ▶ The plate is made of pure lead oxide paste & other chemicals needed to obtain better performance & stability. The grid is made of a high quality lead alloy with calcium & tin which assures better resistance against corrosion.
- ▶ The plates are separated with high quality Glass Matt separators (AGM) which has high porosity for better ionic conductivity. The plates are completely wrapped by the separator & the electrolyte is completely absorbed in the separator & plates.

AGM Battery Technology

Patented Sealed Post

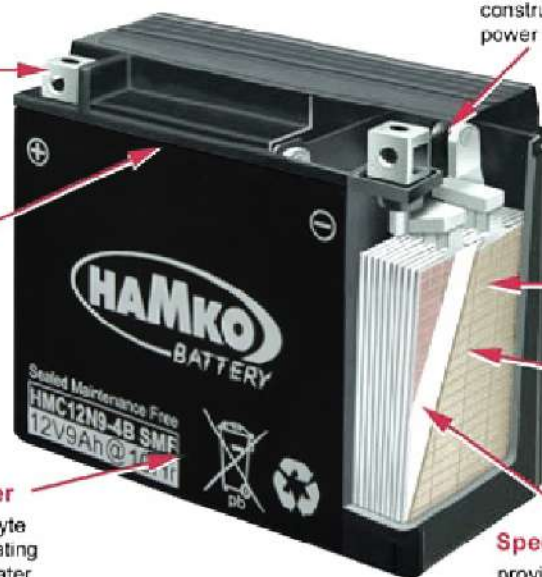

prevents acid seepage, reduces corrosion – extends battery life.

Heat Sealed Case to Cover

protects against seepage and corrosion – bonded unit gives extra strength.

Polypropylene Cover and Container

assures reserve electrolyte capacity for cooler operating temperatures: gives greater resistance to gas and oil – and impact in extreme weather conditions!

Thru-Partition Construction

provides shorter current path with less resistance than "over the partition" construction – you get more cranking power when you need it.

Special Active Material

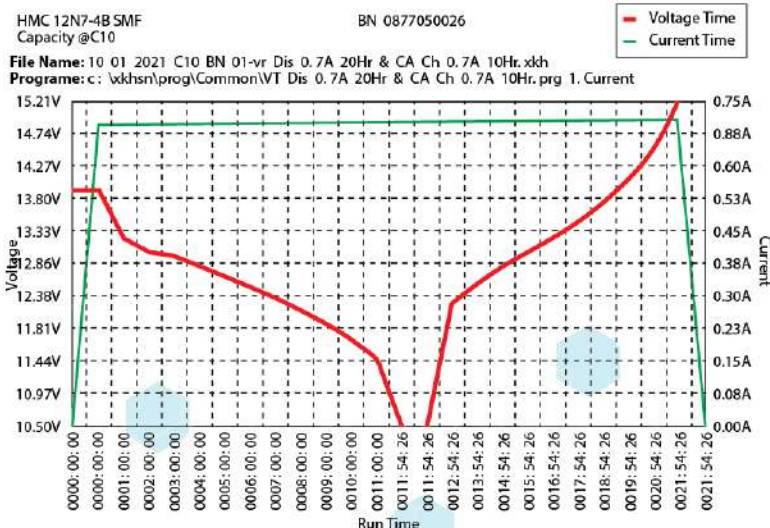

is compounded to withstand vibration, prolong battery life and dependability.

Special Grid Design

withstands severe vibration, assures maximum conductivity.

Special Separator

provides virtually maintenance free operation and makes the battery spill-proof. AGM Technology eliminates water loss.

Product features:

- ▶ Sealed and valve regulated.
- ▶ Maintenance free.
- ▶ High cycling ability.
- ▶ Better CCA
- ▶ Reduced self-discharge.
- ▶ High vibration resistance.
- ▶ Improved charge acceptance.
- ▶ High starting power.
- ▶ Deep discharge resistance.
- ▶ 3 Months Warranty

The graph shows the charge discharge characteristic of HAMKO MCB Battery. The graph also shows the capacity of HAMKO MCB in 10 hour rating as the battery avg. discharge current is 0.7 A. At the time of charging battery voltage increases rapidly & later increases slowly, at last voltage becomes 13.8 with rapid increasing. In case of discharge also the battery being discharged at the particular current at the specified time that renders into 10.5 nominal volt. It ensures to match declared capacity as well as it assures 100% efficiency of HAMKO MCB MF battery.

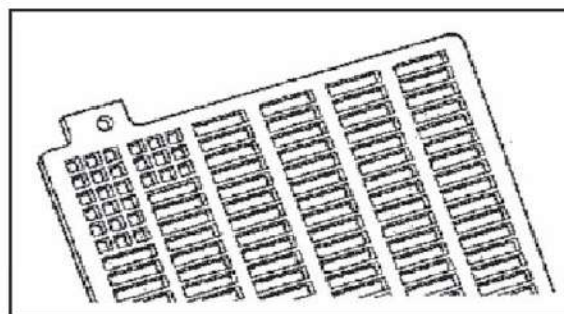

Always Keep With The Best

Consumer benefit of Hamko Motor cycle Battery:

- Design based on AGM technology.
- If does not move daily, Charge remains better.
- High voltage, Sharp light-run safely in dark.
- Charge quicker if sometimes stay in idle condition.
- Long life with better service.
- It sets in any position.
- It resists the temperature.
- No need topping up.
- Leak resistant.
- Long backup due to higher RC if alternator fail.

Lead Calcium Tin Alloy Cast Grid

The cast grid of MC battery contains lead calcium tin alloy, in consequence of it is substantially more resistant to corrosion as well as overcharging, gassing, self discharge and thermal runaway.
